

Quick Start Guide
PXU cameras (USB3 Vision™)

Latest software version and technical documentation available at:

www.baumer.com/vision/login

-Safetv

#### CE

We declare, under our sole responsibility, that the previously described Baumer PXU cameras conform with the directives of the CE.

## RoHS

All PXU cameras comply with the recommendation of the European Union concerning RoHS Rules.

#### **Safety Precautions**

| Notice   |
|--|
| See the User's Guide for the complete safety instructions! |

- Protect the sensor from dirt and moisture.
- Do not allow the camera to become contaminated with foreign objects.

# **Environmental Requirements**

| Storage temp.   | -10°C +70°C     |
|-----------------|-----------------|
| Operating temp. | see Heat Trans- |
|                 | mission         |
| Humidity        | 10 % 90 %       |
|                 | Non-condensing  |

Product Specification

### PX series - Brilliant image quality

- Up to 12 megapixel and 25 fps
- Quad-tap CCD sensors
- Very high dynamic range
- Simplified integration with USB 3 Vision

| Camera Type | Sensor<br>Size | Resolution  | Full Frames<br>[max. fps] |
|-------------|----------------|-------------|---------------------------|
| Monochrome  |                |             |                           |
| PXU-60M.Q   | 1"             | 2752 x 2200 | 25                        |
| PXU-120M.Q  | 1"             | 4248 x 2832 | 13                        |

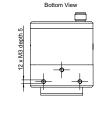

#### Notice

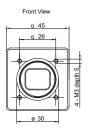

You can operate the camera to USB 2.0 port. However, the frame rate will be less than on a USB 3.0 port.

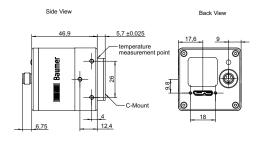

System Requirements

| Single-camera system Recommended |  | Multi-camera system           |  |
|----------------------------------|--|-------------------------------|--|
|                                  |  | Recommended                   |  |
| CPU                              | Intel(R) Core(TM) i5-2520M   | Intel(R) Core(TM) i7-3770 CPU |  |
|                                  | CPU @ 2.50GHz, Cores: 4  | @ 3.40GHz, Cores: 8           |  |
| RAM                              | 4 GB   | 8 GB                          |  |
| Operating                        | Microsoft® Windows® 7 32 / 64 bit systems (required for USB 3.0        |                               |  |
| system (OS)                      | system (OS) Microsoft® Windows® 8 32 / 64 bit systems (required for US |                               |  |

Dimensions

#### Installation

### Lens mount

## Notice

Ensure the sensor and lens are not contaminated with dust and airborne particles when mounting the support or the lens to the device!

The following points are very important:

- Install the camera in an environment that is as dust free as possible!
- · Keep the dust cover (bag) on the camera for as long as possible!
- Hold the printer with the sensor downwards if the sensor is uncovered.
- · Avoid contact with any of the camera's optical surfaces!

**General Description** 

LED signals

| No. | Description              | No. | Description  |
|-----|--------------------------|-----|--------------|
| 1   | Lens mount (C-Mount)     | 4   | USB 3.0 port |
| 2   | LED                      |     |              |
| 3   | Power supply / Digial IO |     |              |

# Notice

The USB 3.0 port is only used for data transfer. The power is supplied via the Power / Digital IO port.

You can operate the camera to USB 2.0 port. However, the frame rate will be less than on a USB 3.0 port.

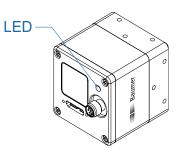

Data Interface / Digital IOs

|              | USB 3.0 | Micro B |            |
|--------------|---------|---------|------------|
| 72343 778818 |         |         |            |
| 1            | VBUS    | 6       | MicB_SSTX- |
| 2            | D-      | 7       | MicB_SSTX+ |
| 3            | D+      | 8       | GND_DRAIN  |
| 4            | ID      | 9       | MicB_SSRX- |
| 5            | GND     | 10      | MicB_SSRX+ |

# Power / Digital IOs (M8 / 8 pins / wire colors of the connecting cable) \_ 5

|   |            | 7      | 3 |              |      |
|---|------------|--------|---|--------------|------|
| 1 | OUT 3      | white  | 5 | IO Power VCC | grey |
| 2 | Power VCC+ | brown  | 6 | OUT 1        | pink |
| 3 | IN 1       | green  | 7 | Power GND    | blue |
| 4 | IO GND     | yellow | 8 | OUT 2        | red  |

| Power Supply      |                       |
|-------------------|-----------------------|
| Power VCC         | 12 V DC 24 V DC ± 20% |
| 1                 | 210 mA 420 mA         |
| Power consumption | approx. 5 W (25 fps)  |

|     | Signal      | Meaning            |
|-----|-------------|--------------------|
|     | green flash | Power on           |
|     | green       | USB 3.0 connection |
| LED | red         | USB 2.0 connection |
|     | yellow      | Data transfer      |
|     | red flash   | Update             |

Installation

# Installing the camera:

- · Connect the camera to the USB connection on your PC using an appropriate cable.
- Connect the camera to power supply
- If required, connect a trigger and / or flash to the digital IOs.

### Installation example 1 - PCI USB board

- 2 USB cable
- 3 Cable for trigger, flash and power

**Heat Transmission** 

# Caution

Heat can damage the camera. Heat must be dissipated adequately to ensure that the temperatures do not exceed the values in the table below.

specific method for proper heat dissipation. As there are numerous possibilities for installation, Baumer do not specifiy a specific method for proper heat dissipation, but suggest the following principles:

- operate the cameras only in mounted condition
- mounting in combination with forced convection may provide proper heat dissipation

| Measurement Point | Maximum Temperature |
|-------------------|---------------------|
| Т                 | 70°C (122°F)        |

Troubleshooting

- 1. Check camera operation using the LED signals.
- → If LED is red:
  - · Camera is connected to USB 2.0.
- $\rightarrow$  If LED is green:
  - Check if camera is being used by another application.
  - Otherwise reconnect camera / restart software.
- 2. Check connection using Windows Device Manager:
- → If device is not listed:
  - Check the host controller power supply.
  - · Check USB 3.0 cable and connection.
- $\rightarrow$  If device is regularly not listed
  - · Check USB 3.0 driver installation.
