

Accessories

Mounting accessories

Shoulder screw M5 as torque support

Features

- Easy mounting in confined a place since no radial space required
- For applications with limited space consumption

Description

Use either rubber buffer Z 119.036 or Z 119.037 according to encoder model. Fix shoulder screw onto the mounting surface. Push encoder onto the drive shaft and position the shoulder screw in the encoder's rubber buffer.

Part number

11034097 Shoulder screw M5 as torque support
(Z 119.040)

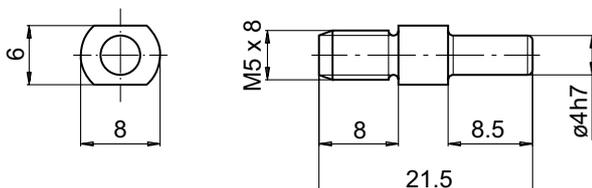

Scope of delivery

Included: Shoulder screw M5

Suitable for

G1M2H, G1MMH, G2MMH, GI341, GI342, GXN1H, GXP1H
